GROWERS OF DEPENDABLE QUALITY HARDY PLANTS AND TREES

Nursery on PEASE ROAD, WOODBRIDGE, CONN., Tel., New Haven, 8-4006 Wm. H. Egan, Prop.

RARE HARDY SHRUBS

DECIDUOUS AZALEAS

These beautiful flowering shrubs, oftentimes overlooked by so many people, should be planted more extensively. They do not require any more attention than other shrubs when planted where soil conditions are acid.

Our plants are all nursery grown. Do not compare them with collected stock.

NEW FLOWERS

The following list of shrubs consists of some of the more recent introductions. They are much superior to most of the older varieties, and should have a place in the garden or shrub border.

THE BEAUTYBUSH—Kolkwitzia amabilis

This hardy shrub is without fault and considered the most noteworthy of recent introductions. The whole plant is graceful and beautiful. It comes from the mountains of Northern China and stands New England conditions admirably. Plants, bushy, 2½ to 3 ft., \$1.00.

THE SHOWY GOLDENBELL—Forsythia intermedia spectabilis

Best of all the Forsythias in free flowering and general habits. A grand shrub completely covered with flowers. Plants 3 ft. 60c; 4 ft., 75c.

KOREAN SPIRAEA—Spiraea trichocarpa

A new spiraea that blooms ten days after the common Spiraea Vanhouttei. The flower clusters are larger. One of the most beautiful of recent introductions. Plants 2 to 3 ft., 60c; 3 to 4 ft., 75c each.

MOCK ORANGE—Philadelphus virginial

One of the best of the hybrid mock oranges. Large, showy double white flowers in June. Plants 2 to 3 ft., 60c.

VIBURNUM CARLESI

A rare species of the snowball family that has pink-white flowers and blooms early. The fragrance is hardly surpassed by the Trailing Arbutus. Good in the rock garden where a medium-sized bush is needed. Grows 4 feet high.

SELECT YOUR FLOWERS FROM OUR TRANSPLANTED PERENNIALS

NURSERY ON PEASE ROAD, WOODBRIDGE, CONNECTICUT.

We offer ten Reliable Rambler Roses that are rated as outstanding among Roses as having special merits.

RELIABLE RAMBLER ROSES

American Pillar. A single-flowering variety of great beauty. The flowers are of large size, 3 to 4 inches across, of a lovely shade of Crimson-Pink, with a clear white eye and yellow stamens.

Climbing American Beauty. A strong, healthy, vigorous grower, frequently making shoots from 10 to 15 feet long, and good sized flowers

for a Climbing Rose. Color a pleasing Carmine.

Dorothy Perkins. Soft shell-pink; flowering profusely in large clusters. Very fragrant and lasting. A grand Rose in every way.

White Dorothy Perkins. (H.W.) A pure white climber, identical with Dorothy Perkins except the color.

Dr. Van Fleet. A Rose, which on account of its dainty color and exquisitely shaped buds and flowers, appeals to everyone. The long, pointed buds are of a rich flesh-pink on stems 12 to 18 inches long. Splendid for cutting.

Excelsa. (H. W.) This sort is known as "Red Dorothy Perkins," and carries the appearance of foliage shown by that sort. The flowers of scarlet-crimson are borne in large trusses, very double and are produced with the greatest profusion.

Hawatha. Small flowers; deep ruby-crimson, featured by a white eye, uniquely borne in long trails of 40 to 50 blooms.

Paul's Scarlet Climber. No other Rose, in any class, can compare with it for brilliancy of color, which is a vivid scarlet. Flowers are semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes. It is of strong growing habit and perfectly hardy.

Silver Moon. Different from all other Roses, with beautiful semi-double flowers, 4½ inches and over in diameter; pure white in color; petals of great substance, beautifully cupped, forming a Clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.

Tausendschon. A strong grower without thorns. Large clusters of Creamy White—Bright Pink in the same cluster.

All above Roses are 65 cts. each, \$6.00 per dozen.

PEAT MOSS

The most satisfactory mulch for Rhododendrons or broad-leaved evergreens of any type is Peat Moss. This we can supply in large full-sized bales at \$3.50 per bale.

OUR GUARANTEE

We guarantee all stock to be first class and true to name and will, upon proper proof, refund the purchase price or replace that which proves otherwise.

It is understood and agreed that we will not be held responsible for any greater amount than the purchase price.

BROADLEAVED EVERGREENS

For planting on the north or west side of the house or in the semi shade. Some varieties will do equally well when planted in the open if it is not a wind swept location. Requires acid soil.

We have a large stock of Mountain Laurel.
